

Eco Collage

Create a collage to illustrate to extent to which we use energy in our daily lives or other aspects of 'Eco living'.

To do this activity you will need:

A collection of magazines, brochures, fliers, photographs.

Scissors, glue, large sheets of paper.

Decide on a relevant shape and make this with the large paper. *You might like to choose a theme or title also for your collage: Clean and Green; Endless Energy; Natural Power; Terrific Technology; Save the planet; Be a saver.*

Cut out relevant pictures, blocks of colour and slogans from the catalogues, brochures, fliers etc that you have collected and stick these onto the large paper.

Agree on a place to **display your collage** and **create a short accompanying poster or sign** to explain how and why you have created this collage.
