

Energy Heroes

Now
that's
a
Pylon!

Now that's a Pylon!

In teams, **build the biggest Pylon that you can** using rolled up newspaper. Explore the more unusual Pylons and Pylon models shown here and on the additional picture sheet to give you some novel ideas. Make sure you photograph your final Pylons so you can share what you have done. (Tweet @energyheroes1 or upload onto the Energy Heroes webpage)

Pylons carry cables and energy to homes and businesses. Energy comes in many different forms and from a variety of sources. **Use the Renewable and Non-Renewable Energy Sheet** to help you discuss different types of energy.
